Summary

Frontend-focused Software Engineer with 1+ year of experience developing scalable enterprise web applications using React, TypeScript, JavaScript, HTML5, CSS3, and Node.js. Experienced in building reusable component-driven user interfaces, integrating REST APIs, optimizing application performance, and delivering end-to-end production features. Passionate about AI-powered applications, collaborative software development, and creating responsive, maintainable, and high-performance user experiences.

Experience

- Developed scalable full-stack enterprise applications using React, TypeScript, Node.js, and PostgreSQL while following Agile development practices and clean coding standards.
- Integrated RESTful APIs using Axios and TanStack Query with efficient server-state management, improving application responsiveness and reducing redundant network requests.
- Integrated RESTful APIs using **Axios** and **TanStack Query** for efficient server-state management, reducing response latency by **30%**.
- Implemented **Redis caching and query optimization**, reducing API response time from 500ms to below 200ms under production load.
- Delivered production features across the Software Development Life Cycle, including requirement analysis, software design, implementation, unit testing with Jest, deployment, and production support.
- Collaborated with frontend, backend, QA, and product teams, contributing **50+ pull requests** while following clean coding and code review best practices.
- Followed Git-based code review workflows, coding standards, and debugging best practices to deliver reliable and maintainable software.

Education

Silicon University

2022 – 2024

MCA

Bhubaneswar

Gayatri +3 Science College

2018 – 2021

B.Sc (Computer Science)

Rourkela

Technical Skills

Languages: JavaScript (ES6+), TypeScript, Java, Python, SQL

Frontend: React.js, HTML5, CSS3, Tailwind CSS, Vite, TanStack Query (React Query), Axios

Backend: Node.js, Express.js, REST APIs, Microservices

Databases: PostgreSQL, MySQL, MongoDB, Redis

Dev Tools: Git, GitHub, Bitbucket, Docker, CI/CD, JIRA, ESLint, Socket.IO

Software Engineering: Agile (Scrum), SDLC, Object-Oriented Programming (OOP), Data Structures & Algorithms, Design Patterns, Performance Optimization

AI Tools: OpenAI API, ChatGPT, GitHub Copilot, Cursor

Projects

HireMitra – AI Recruitment Platform

Node.js, React.js, TypeScript, Axios, PostgreSQL,

- Designed and developed a scalable full-stack AI recruitment platform using React, TypeScript, Node.js, and PostgreSQL to streamline recruiter and candidate workflows.
- Engineered an intelligent job-matching engine achieving **85% accuracy** using multi-criteria filtering and optimized search logic.
- Integrated frontend and backend services through RESTful APIs, improving application responsiveness and performance under concurrent workloads.
- Implemented secure **multi-tenant architecture** with Role-Based Access Control (RBAC), ensuring scalable and maintainable system design.
- Optimized database queries and backend workflows to improve application performance while supporting scalable production-ready deployments.

ReachHub (Client Project)

React.js, Vite, TanStack Query, Axios, Node.js, Javascript, MySQL, Socket.IO

- Developed a scalable lead management platform capable of processing large datasets while maintaining responsive user interactions.
- Incorporated third-party APIs for bulk email and phone number validation to improve lead data quality.
- Implemented real-time dashboards using Socket.IO for live campaign and user activity updates.
